WORK EXPERIENCE

TicketsQue Solutions (2023 June - 2026 Feb)
Mobile App Developer

- Independently designed, developed, and deployed 3 production mobile applications available on Google Play Store and Apple App Store.
- Built end-to-end mobile solutions for ticket booking in pubs and restaurants, handling user flows, bookings, and partner management.
- Developed and maintained the following applications:
- EngageQue – customer-facing booking and engagement app
- TicketsQue – ticket booking and user management platform
- TicketsQue Partners – partner app for venue and booking management
- Worked across the full development lifecycle: requirement analysis, UI implementation, API integration, testing, deployment, and post-release support.
- Ensured application performance, stability, and scalability for real-world users.
- Also build app for CRUISE2 scanner integration for ticket validation in live production apps.

PROJECTS

- **TICKETSQUE PARTNER (Live App)**

  This application is used in pub and restaurants to validate the ticket and redeeming the tickets by scanning the ticket QR code.
  Developed by using react native cli, live in playstore and app store
  Tech Stacks : react native, java-script , redux, react native paper.

- **EngageQue (Live App)**

  This application is used in pub and restaurants to creation of tickets of particular events and by this app itself it can validate that ticket
  Developed by using react native cli, app is available in both playstore and app store
  Tech Stacks : react native, java-script , redux, react native paper.

- **TICKETSQUE (Live App)**

  This application is used for purchasing tickets from pubs and restaurants , (like BookMyShow app).
  Developed by using react native cli, live in playstore and app store
  Tech Stacks : react native, java-script , redux, react native paper, raysorpay, short.io

- **BOOK MY SHOW APP -CLONE**

  This is the clone app of BookMyShow app.
  Made by useing react native cli. Refered the same ui of BookMyShow app.

- **AI Image Generation App**

  Built a fun AI-powered side project using React Native – a Text-to-Image Generator App.
  This project was my way of exploring AI models while learning something new and having some fun along the way.

EDUCATION

Masain School of Coding |2021-2022
Full-stack Development

APJ Abdul Kalam University | 2015-2019
B-Tech

SKILLS

- React Native
- JavaScript
- React Js
- Next Js
- Node.js
- MongoDB
- Tailwind CSS
- Chakra Ui
- Material Ui
- Redux
